**Summary of Algae 2020 Market Analysis: Biofuels, Drop-In Fuels, Biochems, Co-Products**

Graph: Biocrude as Crude-Oil Drop-In Replacement or Supplement for Petroleum Crude Oil
Table: Drop-In Fuels, Renewable Diesel, HRJ Jet Fuel, Renewable Gasoline, Biobutanol
Table: Synthetic Biology Pioneers in Algal Biomass for Biofuels, Drop In Fuels, Biochems
Table: Non-Fuel Biomass Fractions and Valuable Co-Products and Markets
Chart: Algal Biomass Products and Markets, Oil, Protein and Carbohydrate Fractions and Uses
Graph: Algae 2020 Market Value Models For High, Mid, Low Value Products vs Small & Big Markets
Table: Algae 2020 Market Size and Value Matrix of High, Mid and Lower Value Products, Including Pharmaceuticals, Specialty Chemicals, Nutraceuticals, Livestock and Fish Feed, and Oil for Biofuels

**Algae Production Systems, Economics, CAPEX, OPEX and Selection Criteria**

Graph: Algal Production Systems Diagram: Inputs, Production, Harvesting, Extraction, Refining
Graph: Algae Production Systems Diagram Step 1: Input Criteria, Species Selection, Light, Water, CO2
Graph: Algae Production Systems Diagram Step 2: Production System Types, Components, Variables
Graph: Algae Production Systems Diagram Step 3: Harvesting and Dewatering System Types, Criteria
Graph: Algae Production Systems Diagram Step 4: Extraction & Oil Recovery Systems, Selection Criteria
Graph: Algae Production Systems Diagram Step 5: Algal Biomass Products, Markets, and Selection Criteria

**Techno-Economic Systems Analysis of Algal Biomass Production, Including CAPEX, OPEX Figures**

Chart: Economics of Algal Oil Production Costs in Open Ponds and Photobioreactors CAPEX, OPEX
Chart: Economic Systems Analysis of Algal Oil Production in Open Ponds CAPEX, OPEX by Component
ALGAE 2020:  
Vol 2: Global Biofuels, Drop-In Fuels, Biochems and Commercial Market Forecasts

**TABLE OF CHARTS, GRAPHS, ILLUSTRATIONS AND FIGURES (continued)**

**Algal Biochemicals and Biopolymers Markets: Introduction, Applications, Target Product Markets**
- Matrix of Biochemical Products From Algae: Adhesives, Polymers, Coatings, Textiles, Inks, Polyesters
- Algal Polymers: Diagram of Poly (Vinyl Chloride) Monomers to Polymers
- Algal Polymers: Diagram of Disaccharides: Maltose and Fructose Acetic Functional Groups, Catalysis
- Diagram of Thermal Depolymerization vs Thermosetting Degradation for Bioplastics, Biopolymers
- Diagram of Functional Biopolymers: Alkenes, Alkynes, Alcohols (Ethanol), Esthers, Amines
- Diagram of Carboxyl Groups: Acetic Acid, Acetone, Acetyl Chloride, Acetaldehyde, Methyl Acetate
- Diagram: From Monomers (i.e. Ethylene Glycol) To Polyethylene for BioPlastic Bottles, Polyester Fabrics
- Diagram of Monomers to Polymers To Create Bio-Based Nylons
- Graph of Bio-Products, Including Polyethylene, Vinyl Chloride, Styrene, Plexiglas, and Acrylic Fibers
- Matrix of BioPolymers as Packaging Products from Sugars and Starches to Polylactic Acid, Polyethylene

**Algae Business Models, Strategies and Player Profiles**
- Matrix and Examples of 12 Different Algae Business Models, Strategies. With Case Studies of Each:
  1. 01 Open Pond Owner-Operators Model
  2. 02 Open Pond Licensors of Technology
  3. 03 Open/Fish Ponds - Land Lease Model
  4. 04 Renewable Drop In Fuels - Owners and Operators Model
  5. 05 Renewable Drop In Fuels - Licensors of Technology
  6. 06 The Microbial Fermentation Model
  7. 07 The Ethanol Fermentation Model
  8. 08 Closed (PBR) Systems for High-Value Products
  9. 09 Bioremediation - Mitigating Farm, Waste-Run Off Problems With Algae
  10. 10 Carbon Capture and Remediation Strategy (CO2 capture + produce fuels)
  11. 11 End Users – Using Algae as Feedstock Supplies (refineries)
  12. 12 Biomass Gasification for Power Generation

**Market Investment Trends and Drivers for Algal Biofuels and Biomass Co-Products**
- Table – Investment Trends in Algal Biofuels Arrive in Three Waves: PPPs, Private, Commercial
- Algae Finance Trends, Funding Increases: Algae Investment and Grants – Selected Projects
- Public-Private Projects: Chevron-NREL Collaborative R&D, Illustration
- Public-Private Projects: DARPA-UOP Collaborative R&D, Illustration
- Public-Private Projects: Shell-HR Biopetroleum Collaborative R&D, Illustration
- Table – Biocrude Feedstocks and Fuels Selected Air Transport, Renewable Diesel Projects
- Matrix of Aviation Markets, Tests: Algae, Camelina, Jatropha, Palm, Babasu Commercial Demos
- World’s First Algae Commercial Test Aviation Test – Continental-Boeing-UOP-Sapphire On Site Photo

**Markets and Marketing Strategies for Algal Biomass Products and Producers**
- Graph: Algal Product and Market Strategies for Oil, Protein and Carbohydrate Fractions
- Graph: Algal Biomass – One Feedstock, Many Products, Fuel, Feed, Fiber, Fertilizer, CoProducts
- Graph: Target Market Strategies for Algal Biomass
- Graph: Higher Value Markets for Fish and Animal Feed in The Start Up Phase for Proteins
- Graph: Higher Value Markets for Renewable Oils in The Start-Up Phase, Oleochemicals, Nutritionals
- Graph: Fishmeal Pellets at 65% Protein As A High Value Co Product, Time Series Price Illustration

**Chart: Biomass To Power Markets for Algal Biomass in the US, by State, Under RPS**
- Table: RFS Regulations in The US, RECs and Values by State by Daily Pricing
- Graph: US Renewable Energy Credits (RECs) Wholesale Voluntary REC Prices By Resource Type
TABLE OF CHARTS, GRAPHS, ILLUSTRATIONS AND FIGURES (continued)

**Algae 2020 Biofuels Market Forecasts and Commercialization Outlook**
Algal Biofuels Market Forecast: Current Deployment-Level Algal Producers 2011-2025
Algal Biofuels Producers: Timeline and Volumes of Production, by Company, 2011-2025
Algal Biomass Fractions and Product Markets for Oils, Proteins and Carbohydrates
Species Selection: Market Demand for Oils, Protein Drives Species Selection Criteria

**Algae 2020 Market Forecasts: Biomass, Biofuels, Drop-In Fuels, Biocrude Commercialization Outlook**
Early Phase Deployment Into Entry-Stage Markets: Small Niche Markets for High Value Products
Mid-Term Phase Deployment Into Medium Size Markets Mid-Value for Livestock Feed and Consumer Products
Longer-Term Commercial Deployment Into Large Scale Markets for Lower Value Biofuels Products to 2020

**Algae Market Deployment In Five Phases: Commercialization Timeline and Evolution**
First Deployment Phase: High-Value Products, Including Nutraceuticals, Specialty Biochemicals and Biopolymers
Second Deployment Phase: Commercial Markets For Defense, Governments and Aviation
Third Deployment Phase: Commercial Markets C02 and Bioremediation Co-Location and Production
Fourth Deployment Phase: Early Commercial Penetration and Deployment Into Biofuels, Drop-In Fuels Markets
Fifth Deployment Phase: Large Scale Commercial Market Deployment of Biofuels and Drop-In Fuels
